THE ANNALS OF APPLIED BIOLOGY

EDITED BY

R. W. MARSH

AND

I. THOMAS

WITH THE ASSISTANCE OF

F. J. ANSCOMBE

J. T. MARTIN

F. C. BAWDEN

D. J. WATSON

VOLUME 39

CAMBRIDGE
AT THE UNIVERSITY PRESS
1952

Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley, University Printer)
and published by the Cambridge University Press

London: Bentley House, N.W. 1

American Branch: New York

Agents for Canada, India, and Pakistan: Macmillan

CONTENTS

No. 1 (MARCH 1952)

	PAGE
1. An improved laboratory apparatus for applying direct sprays and surface films, with data on the electrostatic charge on atomized spray fluids. By C. POTTER. (With Plate 1 and 5 Text-figures)	1
2. Dry-rot disease of the potato. I. Effect of commercial handling methods on the incidence of the disease. By C. E. FOISTER, A. R. WILSON and A. E. W. BOYD	29
3. Dry-rot disease of the potato. II. Fungi causing dry rot of seed potatoes in Britain. By R. K. MCKEE	38
4. Dry-rot disease of the potato. III. A biological method of assessing soil infectivity. By R. K. MCKEE and A. E. W. BOYD. (With 1 Text-figure)	44
5. A disease of <i>Scabiosa caucasica</i> caused by the nematode <i>Aphelenchoides blastophthorus</i> n.sp. By MARY T. FRANKLIN. (With Plate 2 and 2 Text-figures)	54
6. Studies in <i>Rubus</i> virus diseases. II. Three types of vein chlorosis of raspberries. By C. H. CADMAN. (With Plates 3 and 4)	61
7. Studies in <i>Rubus</i> virus diseases. III. A veinbanding disease of raspberries. By C. H. CADMAN. (With Plate 5)	69
8. Studies on the aphid transmission of a strain of henbane mosaic virus. By R. H. E. BRADLEY. (With 1 Text-figure)	78
9. Some effects of a plant virus on nuclear division. By JOHN CALDWELL. (With Plate 6)	98
10. Studies of the clove tree. IV. Natural grafting and its bearing on sudden-death disease. By F. M. L. SHEFFIELD. (With Plates 7 and 8) .	103
11. The competition between barley and certain weeds under controlled conditions. V. Competition with clover considered as a weed. By HAROLD H. MANN and T. W. BARNES	111
12. The chemical control of water weeds in the Gezira area of the Sudan. I. Preliminary experiments. By K. WILSON JONES and F. W. ANDREWS .	120
13. Variation within French bean varieties. By A. J. BATEMAN. (With 2 Text-figures)	129

	PAGE
14. Proceedings of the Association of Applied Biologists, 12 October 1951:	
Introduction. By V. B. WIGGLESWORTH	139
Insects in relation to the accumulation and adherence of insecticides. By W. A. L. DAVID	140
The role of cuticle and egg-shell membranes in the penetration of insecticides. By J. W. L. BEAMENT	142
Features of the ecology and control of the sheep tick, <i>Ixodes ricinus</i> L., in Britain. By A. MILNE	144
Aspects of the physiology of the sheep tick. By A. D. LEES	146
Reviews	149

No. 2 (JUNE 1952)

1. Some factors affecting the transmission of leaf-roll virus by aphids. By B. KASSANIS. (With Plate 9)	157
2. The biology of the rice weevil, <i>Calandra oryzae</i> (L.). By R. W. HOWE. (With 1 Text-figure)	168
3. The ecology of <i>Anisopus fenestralis</i> Scop. (Diptera) in sewage bacteria beds. By H. A. HAWKES. (With 2 Text-figures)	181
4. Studies in the mode of action of insecticides. I. Injection experiments on the role of cholinesterase inhibition. By H. S. HOFF	193
5. Insecticidal-action studies with bisdimethylamino fluorophosphine oxide containing ³² phosphorus. By W. A. L. DAVID	203
6. A table of Abbott's correction for natural mortality. By M. J. R. HEALY	211
7. Petroleum oil fractions as plant spray materials. The effect of refining an oil upon its degree of phytotoxicity. By J. W. HERINGA and T. SWARBRICK	213
8. Investigations into the host ranges of <i>Ditylenchus destructor</i> and <i>D. dipsaci</i> . By J. BASIL GOODEY. (With Plate 10)	221
9. Investigations of the inhibitory action of <i>Bacillus subtilis</i> on <i>Fusarium udum</i> Butl., the fungus causing wilt of pigeon-pea (<i>Cajanus cajan</i> (L.) Millsp.). By R. S. VASUDEVA, A. C. JAIN and K. G. NEMA	229
10. Factors affecting the survival of <i>Plasmodiophora brassicae</i> Wor. in the soil and its assessment by a host test. By I. MACFARLANE. (With 3 Text-figures)	239

	PAGE
11. An automatic volumetric spore trap. By J. M. HIRST. (With Plate 11 and 2 Text-figures)	257
12. Some effects of nitrogen nutrition on the morphology and anatomy of marrow-stem kale. By S. E. ARNEY. (With 1 Text-figure)	266
13. Proceedings of the Association of Applied Biologists, 8 and 9 January 1952:	
Recent work in Ayrshire on the control of potato-root eelworm.	
By JOHN GRAINGER	277
Nickel toxicity in plants. By J. G. HUNTER and O. VERGNANO	279
Report of the Council of the Association of Applied Biologists for the year 1951	285
Report of the Honorary Treasurer for the year ending 31 December 1951.	288
Report of the Honorary Editor for 1951	289
Association of Applied Biologists Plant Pests and Diseases Committee, Report for 1951	290
Reviews	291
Accounts	293

No. 3 (SEPTEMBER 1952)

1. Studies on plant growth-regulating substances. V. Steric factors in relation to mode of action of certain aryloxyalkylcarboxylic acids. By M. S. SMITH, R. L. WAIN and F. WIGHTMAN. (With Plate 12 and 4 Text-figures)	295
2. The phytotoxic properties of alternaric acid in relation to the etiology of plant diseases caused by <i>Alternaria solani</i> (Ell. & Mart.) Jones & Grout. By P. W. BRIAN, G. W. ELSON, H. G. HEMMING and JOYCE M. WRIGHT. (With Plate 13 and 2 Text-figures)	308
3. Dry-rot disease of the potato. IV. Laboratory methods used in assessing variations in tuber susceptibility. By A. E. W. BOYD. (With Plate 14)	322
4. Dry-rot disease of the potato. V. Seasonal and local variations in tuber susceptibility. By A. E. W. BOYD. (With 2 Text-figures)	330
5. Dry-rot disease of the potato. VI. Varietal differences in tuber susceptibility obtained by injection and riddle-abrasion methods. By A. E. W. BOYD. (With 1 Text-figure)	339
6. Dry-rot disease of the potato. VII. The effect of storage temperature upon subsequent susceptibility of tubers. By A. E. W. BOYD	351

7. Some effects of high temperature on the susceptibility of plants to infection with viruses. By B. KASSANIS. (With Plate 15)	358
8. Studies of fluctuations in insect populations. XII. Further evidence of prolonged larval life in the wheat-blossom midges. By H. F. BARNES. (With 1 Text-figure)	370
9. Studies of fluctuations in insect populations. XIII. An improved method of ascertaining the correct date to sample when assessing larval infestations of the wheat-blossom midges. By H. F. BARNES. (With 2 Text-figures)	374
10. Soil sampling for wheat-blossom midges. By W. H. GOLIGHTLY. (With 1 Text-figure)	379
11. Further observations on the biology of the cabbage root fly, <i>Erioischia brassicae</i> Bché. By MARY MILES	385
12. The action of metaldehyde on the slug <i>Agriolimax reticulatus</i> (Müller). By J. B. CRAGG and MYRTLE H. VINCENT. (With 1 Text-figure)	392
13. Insecticides for preventing barnacle settlement. By G. DUNCAN WAUGH, F. B. HAWES and F. WILLIAMS. (With Plate 16 and 2 Text-figures)	407
14. Proceedings of the Association of Applied Biologists, 14 March 1952:	
Herbicides	
The relative toxicity of nitrophenols to various organisms. By E. W. SIMON	416
The phytotoxicity of mineral oils and hydrocarbons. By G. W. IVENS	418
The effects of 'hormone' herbicides upon cereal crops. By E. B. SCRAGG	423
Systemic fungicides	
Introduction. By R. L. WAIN	429
Techniques in the bioassay of systemic fungicides. By S. H. CROWDY	432
Antibiotics as systemic fungicides and bactericides. By P. W. BRIAN	434
The evaluation of systemic fungicides by means of <i>Alternaria solani</i> on tomato. By J. STUBBS	439
Root injury as a factor in the assessment of chemotherapeutants by the tomato <i>Fusarium</i> wilt test. By W. G. KEYWORTH	441
Reviews	443

No. 4 (DECEMBER 1952)

	PAGE
1. Pot tests of nematicides against potato-root eelworm. I. Pilot test and methods. By B. G. PETERS. (With 1 Text-figure)	447
2. The bio-assay of potato-root diffusate. By D. W. FENWICK. (With 5 Text-figures)	457
3. The influence of the host on the dimensions of the plant parasitic nematode, <i>Ditylenchus destructor</i> . By J. BASIL GOODEY. (With 2 Text-figures)	468
4. Studies in the relationship of eelworms and bacteria to certain plant diseases. I. The etiology of strawberry cauliflower disease. By J. E. CROSSE and R. S. PITCHER. (With Plate 17)	475
5. Resolution of strawberry virus complexes. V. Experiments with viruses 4 and 5. By I. W. PRENTICE	487
6. Studies in <i>Rubus</i> virus diseases. IV. Yellows diseases of raspberries. By C. H. CADMAN. (With Plate 18)	495
7. Studies in <i>Rubus</i> virus diseases. V. Experiments in the analysis of Lloyd George decline. By C. H. CADMAN. (With Plate 19)	501
8. The influence of planting date and manuring on the incidence of virus diseases in potato crops. By L. BROADBENT, P. H. GREGORY and T. W. TINSLEY. (With 1 Text-figure)	509
9. The changing numbers of <i>Aphis fabae</i> Scop., flying at crop level, in relation to current weather and to the population on the crop. By C. G. JOHNSON. (With 7 Text-figures)	525
10. The penetration of the insect cuticle by DDT and related compounds. By G. ARMSTRONG, F. R. BRADBURY and H. G. BRITTON. (With 2 Text-figures)	548
11. The use of tetra- and penta-chloronitrobenzenes in the control of <i>Botrytis</i> disease and <i>Rhizoctonia</i> attack of lettuce. By F. T. LAST. (With 1 Text-figure)	557
12. Observations on apple canker. IV. The infection of leaf scars. By S. H. CROWDY. (With Plate 20 and 3 Text-figures)	569
13. Observations on apple canker. V. Eradicant spraying and canker control. By R. J. W. BYRDE, S. H. CROWDY and F. A. ROACH	581

14. Scab, canker, and branch blister of apple at East Malling in relation to nutritional treatment of the host. By M. H. MOORE and MARGERY BENNETT	588
15. Acute die-back of clove trees in the Zanzibar Protectorate. By F. J. NUTMAN and F. M. ROBERTS. (With Plates 21 and 22)	599
16. Studies in the bacterial die-back and canker disease of poplar. I. The disease and its cause. By K. A. SABET and W. J. DOWSON. (With Plate 23)	609
Obituary notice. Professor F. T. BROOKS	617
Reviews	620
